

GEATOR IMP

Chemical Nature:	water base surfactant mixture
Active Substance:	approx. 38%
pH:	approx. 6,5
Ionic Charge:	non-ionic
Aspect:	orange liquid
Utilization:	penetrator for impregnation and finishing

PROPERTIES

GEATOR IMP is a penetration agent. Due to its chemical nature, GEATOR IMP enables an good penetration of the resins used in impregnation for both full grain and corrected grain leathers. Since there are no ammoniac components, GEATOR IMP does not present risk of staining the leathers when they are piled or hanged to dry. It is recommended a usage from 60 to 80 g/L of GEATOR IMP in impregnation solutions for buffed leathers, and from 80 to 100 g/L in solutions for full grain leathers. GEATOR IMP can also be used as penetration auxiliary for finishing in general.
