

## **GEOTAN CD 90**

<b>Chemical Nature:</b>	chemically modified polymer of high molecular weight and considerable softness.
<b>Active Substance:</b>	approx. 28%
<b>pH (10%):</b>	approx. 5,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	liquid
<b>Light Fastness:</b>	optimal
<b>Utilization:</b>	all types of Retanning

### **PROPERTIES**

---

GEOTAN CD90 is a polymeric Retanning agent specially developed for leathers with good filling and "round" touch. GEOTAN CD90 provides softness and tight grain. It can be used for all kind of leathers and in different stages of the Retanning process, whether in rechroming, beginning or end of the Retanning, as well as at the end of the process, after the main fatliquoring.

The recommended pH to enhance its characteristics is between pH 4.6 and pH 5.5. The indicated percentage to offer is between 4% and 6% (over the shave weight) according to the desired article. When GEOTAN CD90 is used for tumbled leathers, it provides a uniform and small pebble.
