

## **GEOFAT GSF**

<b>Chemical Nature:</b>	combination of natural and synthetic oils
<b>Active Substance:</b>	approx. 41%
<b>pH:</b>	approx. 6,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	chestnut viscous liquid
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOFAT GSF is a fatliquor developed to give softness, filling and silky hand feeling to the leathers. GEOFAT GSF produces very fine emulsions that makes the penetration and distribution over the entire structure of the hide easy. It can be used in the fatliquoring of various articles: patent, semi-chrome, nubuck, and all napa type leathers. It is indicated to use it as main fatliquor, but it can also be combined with other fatliquors of the GEOFAT range according to the desired effect.
