

GEATEN 7

Chemical Nature:	combination of binding agents and aqueous based auxiliary products
Ionic Charge:	non ionic
Aspect:	slightly yellowish liquid
Utilization:	crosslinking agent

PROPERTIES

GEATEN 7 is a polyfunctional crosslinking agent suitable for increase physical resistance in mixtures of protein binders, polyamides, acrylic polymers, polyurethanes and nitroemulsions. The pot-life of the mixtures is relatively long, so they are not created problems in the productive pace. It is advisable to use around 1 to 3% on the amount of binders
