

GEOFAT MW

Chemical Nature:	“mayonnaise-like” combination of natural oils
Active Substance:	approx. 48%
pH:	approx. 7,5
Ionic Charge:	anionic
Aspect:	viscous yellow liquid
Utilization:	upper leather in general and specifically vegetable-tanned sole leather

PROPERTIES

GEOFAT MW is a “mayonnaise-like” oil produced from natural raw materials. Because of the characteristics of its components, GEOFAT MW significantly improves tear resistance and grain break when used in upper leather or small skins. Also, GEOFAT MW is specifically used on vegetable-tanned leather where it provides excellent lubrication of the grain, resulting in a light, clean shade. Specifically, when applied to sole leather, it is recommended to add this product in dry form without dilution in order to achieve the desired effect. Moreover, GEOFAT MW may also be used in combination with other sulphated or sulphited oils in the GEOFAT range, depending on the desired article.
