

## **GEORESIN CKL**

<b>Chemical Nature:</b>	acrylic copolymer in emulsion
<b>Active Substance:</b>	approx. 38%
<b>pH:</b>	approx. 8,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	white opalescent liquid
<b>Utilization:</b>	crackle type articles

### **PROPERTIES**

---

GEORESIN CKL is a very hard acrylic copolymer, bright and transparent. Due to its specific characteristics, GEORESIN CKL is indicated for crackle type articles on full grain leathers, corrected grain leathers and splits. When applied on other kind of finishes, GEORESIN CKL enhances cracking fastness and obtain a brittle and resistant film.
