

## **GEATEN VKL**

<b>Chemical Nature:</b>	combination of enzymes and additives
<b>pH (10%):</b>	approx. 8,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	powder
<b>Utilization:</b>	liming auxiliary recommended to clean hides and reduce stretch marks and wrinkles

### **PROPERTIES**

---

GEATEN VKL is an enzymatic agent capable of removing substances that jeopardise the fast, even penetration of the products used in liming. Its action helps inhibit the appearance of stretch marks on the belly and wrinkles on the neck area thus leaving the surface of hides clean and smooth. GEATEN VKL also helps remove fat and hair roots from the epidermis, resulting in deep penetration of other liming products. It is recommended to use GEATEN VKL in soaking and at the beginning of the liming process.
