

GEOFAT SVM

Chemical Nature:	combination of sulphonated natural oils
Active Substance:	approx. 50%
pH:	approx. 7,0
Ionic Charge:	anionic
Aspect:	brown liquid
Utilization:	Universal fatliquor for all types of leather

PROPERTIES

GEOFAT SVM is a sulphonated natural oil recommended for leather that requires firm grain, softness, full feel and a silky surface. Use GEOFAT SVM on leather for footwear and leathersgoods. Its composition provides great stability to vegetable tannins therefore its use is recommended in the fatliquoring of full vegetable leather such as leather for soles, belts, leathersgoods and footwear. To enhance the characteristics desired in each article, it is recommended to combine this product with the other oils in the GEOFAT range. GEOFAT SVM may be used together with tallow-based fatliquors such as GEOFAT SG 300, SG 500 and GEOFAT SGP. Due to its composition, it prevents the grain from breaking. When used on suede-like leathers it provides optimal surface feel, bright colours and very good writing effect.
