

GEOFAT 1450

Chemical Nature:	natural self-emulsive raw oil
Active Substance:	approx. 98%
Ionic Charge:	non-ionic
Aspect:	yellowish chestnut liquid
Stability to Electrolytes:	low
Light Fastness:	good
Utilization:	burnishable leathers

PROPERTIES

GEOFAT 1450 is a self-emulsifier raw fatliquor. It is indicated to use on veg type leathers to give excellent reactivity and burnish characteristics. GEOFAT 1450 protects the grain from high loads of veg tannins applications. GEOFAT 1450 can be used combined with the main fatliquoring or also at the end of the process, where it will highlight the burnish effect.
