

GEATOR 2300

Chemical Nature:	mixture of surfactants in aqueous base.
Active Substance:	approx. 28%
pH:	approx. 6,5
Ionic Charge:	anionic
Aspect:	slightly yellowish liquid
Utilization:	penetrator for impregnation and finishing

PROPERTIES

GEATOR 2300 is a penetration agent. Due to its chemical nature, GEATOR 2300 enables an good penetration of the resins used in impregnation for both full grain and corrected grain leathers. Since there are no ammoniac components, GEATOR 2300 does not present risk of staining the leathers when they are piled or hanged to dry. It is recommended a usage from 60 to 80 g/L of GEATOR 2300 in impregnation solutions for buffed leathers, and from 80 to 100 g/L in solutions for full grain leathers. GEATOR 2300 can also be used as penetration auxiliary for finishing in general.
