

GEORESIN H 71

Chemical Nature:	acrylic polymer emulsion
Active Substance:	approx. 35%
pH:	approx. 8,0
Ionic Charge:	anionic
Film Hardness:	very soft
Film Transparency:	transparent
Aspect:	yellowish-white opalescent liquid
Utilization:	soft finishes

PROPERTIES

GEORESIN H71 is a very soft acrylic resin, extremely resistant, elastic, with low surface tack. This acrylic emulsion is specially indicated for pigmented covering coats, for articles that require good covering with a natural look. It can be also used as impregnation resin and, for finishing, it can be used along with other acrylic resins, polyurethane dispersions and auxiliaries. The usage of GEORESIN H71 is indicated for articles like shoe napa.
