

## **GEOFAT L 99**

<b>Chemical Nature:</b>	lecithin-based oil
<b>Active Substance:</b>	approx. 38%
<b>pH:</b>	approx. 6,0
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	viscous liquid
<b>Utilization:</b>	Leather that requires silky feel and good fatliquoring distribution

### **PROPERTIES**

---

GEOFAT L 99 is a natural phospholipid-based fatliqor with good emulsifying power. It has been developed to provide silky touch to leather as well as facilitating the distribution and penetration of the other fatliquors applied. Thanks to those properties, GEOFAT L 99 is especially recommended as fatliquoring auxiliary for vegetable-tanned leather. Therefore, it is recommended to combine it with the other oils for "pure vegetable" leather in the GETTI range. GEOFAT L 99 may also be applied on articles made from semi-chrome and vegetable leather as well as napas in general. Its composition results in light, soft leather with a pleasant surface feel.
