

## **GEORESIN RP 86**

<b>Chemical Nature:</b>	acrylic copolymer in emulsion
<b>Active Substance:</b>	approx. 40%
<b>pH:</b>	approx. 4,0
<b>Ionic Charge:</b>	anionic
<b>Film Hardness:</b>	soft
<b>Film Transparency:</b>	transparent
<b>Aspect:</b>	white opalescent liquid
<b>Utilization:</b>	adhesion for foil application

### **PROPERTIES**

---

GEORESIN RP86 is a soft acrylic dispersion, specially indicated as adhesion for foil application. Its application is suggested by spray, in a 1:1 solution with water. Due to its special characteristics, it has very low surface tack and high resistance against solvents.
