<b>Stability to Electrolytes:</b>	medium
<b>Stability to Acids:</b>	very good at a pH above 2.0
<b>Light Fastness:</b>	excellent
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOFAT SB is a fatliquor of high quality, made from specially selected raw materials. Refrigerated and filtrated below 0 °C, it provides excellent performance fatliquoring. It produces soft, full and silky hand feeling leathers, without compromising the grain tightness. Due to its special sulphatation, it presents good penetration and high affinity with the leather fibers. Due to its excellent light fastness its usage is also indicated for athletic white leathers.
