

GEATAN FP

Chemical Nature	combination of a phenol-based synthetic tannin and a dihydroxy diphenyl sulphone
:	
Active Substance:	approx. 94%
pH (10%):	approx. 4,0
Ionic Charge:	anionic
Aspect:	yellowish white liquid
Light Fastness:	good
Utilization:	replacement tannin for the pre-tanning and retanning of leather

PROPERTIES

GEATAN FP is a replacement tannin with good tanning power used in the pre-tanning of vegetable-tanned leather and chrome-tanned leather retanning. By applying GEATAN FP in pre-tanning, it is possible to condition the hides for the shaving operation. When applied in retanning, GEATAN FP provides fine, firm grain, filling and good dispersing action on the other retanning products used. GEATAN FP results in light, highly even colours. In retanning it is recommended to use between 2 and 4% GEATAN FP, calculated on the weight of the shaved pelts. Also, GEATAN FP provides good light fastness.
