

GEOFAT PX 80

Chemical Nature:	sulphited fish oil
Active Substance:	approx. 80%
pH:	approx. 6,5
Ionic Charge:	anionic
Aspect:	reddish chestnut liquid
Stability to Electrolytes:	very good
Stability to Acids:	very good at a pH above 2.0
Light Fastness:	good
Utilization:	soft leathers

PROPERTIES

GEOFAT PX80 is a sulphited fish oil produced from excellent quality bases and origin control. It has high softening capacity, forms a fine emulsion and has good stability to hard water and electrolytes. As it has strong penetration capacity, it deeply lubricates the fibers. It is especially recommended for the fatliquoring of soft leathers in general, as well as goat and sheep skins. Its application is indicated between 3% to 8% over wet blue shaved weight.
