

GEALUX K 33

Chemical Nature:	combination of special waxes.
Active Substance:	approx. 15%
pH:	approx. 7,0
Ionic Charge:	slightly cationic
Aspect:	yellowish viscous solution
Utilization:	pre-bottom

PROPERTIES

GEALUX K 33 is a pre-bottom used for surface covering. This property can be improved after polishing or glazing. It is indicated to dilute the product in water and polar solvents according to the desired effect. On full grain leathers, GEALUX K 33 improves "grain off" problems and other defects. On corrected grain leathers, it provides grain reconstruction and smooth surface.

Its balanced composition gives silky hand feeling and natural look, without compromising the finish adhesion.
