

GEALUX ST

Chemical Nature:	composition of synthetic and natural waxes with noble silica
Active Substance:	approx. 23%
pH:	approx. 9,0
Ionic Charge:	anionic
Aspect:	white viscous solution
Utilization:	matt layers

PROPERTIES

GEALUX ST is a balanced composition of synthetic and natural waxes-based auxiliary agents allied to matting agents originate from extremely fine silica, and of very high covering power. GEALUX ST was especially developed to be used as only auxiliary in a pigmented layer solution, where it provides a high closing power, eliminating the stickiness of the used resins. Due to those characteristics, GEALUX ST is particularly used in upholstering finishes, providing a fast covering, of agreeable touch and without stickiness.
