

GEOFAT LW

Chemical Nature:	synthetic oil of universal use
Active Substance:	approx. 45%
pH (10%):	approx. 6,5
Ionic Charge:	anionic
Aspect:	yellowish white liquid
Light Fastness:	excellent
Utilization:	all kind of articles

PROPERTIES

GEOFAT LW is a synthetic fatliquor to be use in any kind of leathers. It provides very good softness and lightness for napa type leathers. Since it presents tight grain results, GEOFAT LW CAN used on heavy substance leathers. GEOFAT LW has excellent light fastness and aging resistance, therefore it is recommended for white athletic leathers in general. With excellent softness power, GEOFAT LW can be used alone or combined with other fatliquors form the GEOFAT range.
