

GEORESIN M 35

Chemical Nature:	acrylic copolymer in emulsion
Active Substance:	approx. 31%
pH:	approx. 6,5
Ionic Charge:	anionic
Film Hardness:	very soft
Film Transparency:	transparent
Aspect:	white opalescent liquid
Utilization:	soft finishes

PROPERTIES

GEORESIN M35 is an emulsion of acrylic copolymers that provides an extremely elastic and soft film. Indicated for high performance finishes, GEORESIN M35 has excellent results of covering with a natural look, always achieving excellent physical-mechanic properties. GEORESIN M35 have perfect applicability for articles like napa and tumbled classic articles, that requires elastic and soft finishes. GEORESIN M35 is also indicated for articles that require fastness against water and solvent.
