

## **GEOTAN GTA**

<b>Chemical Nature:</b>	water base glutaraldehyde
<b>pH:</b>	approx. 3,7
<b>Aspect:</b>	transparent liquid
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOTAN GTA is an glutaraldehyde tanning agent excellent for tanning and retanning processes. It can be used in many applications in order to improve the quality of the leather, resulting in leathers fuller and softer without making them heavier. GEOTAN GTA also improves their wash-fastness and perspiration resistance. It can be used as pre-tanning agent and as retanning agent for garments and soft napa. GEOTAN GTA should be diluted with water at a ratio of 1:1 – 1:2.5 before it is applied.
