| Chemical Nature: | combination of natural and synthetic oils |
| Active Substance: | approx. 52% |
| pH: | approx. 7,0 |
| Ionic Charge: | anionic |
| Aspect: | yellowish brown liquid |
| Utilization: | leather with strong vegetable tanning |

PROPERTIES

GEOFAT VGT is oil especially developed for retanned leather that requires the characteristics of vegetable tanned leather. It provides excellent fibre lubrication, round, silky, soft feel, and makes repolishing easy. Due to its combination of natural and synthetic components, it can be used as an only product and applied either together with the tannins or in the main fatliquoring in a separate float. GEOFAT VGT may also be used on any other type of leather requiring the above-mentioned characteristics. If used as the only oil, it is recommended to apply it in the 5-10% ratio calculated on the weight of the shaved pelts, dosed in various additions and as per the article being produced.
