

GEALUX CK 25

Chemical Nature:	compound of natural oils and waxes
Active Substance:	approx. 38%
pH:	approx. 5,0
Ionic Charge:	amphoteric
Aspect:	yellowish, white liquid with medium viscosity
Utilization:	leather with oily feel and mild pull-up effect

PROPERTIES

GEALUX CK 25 has been especially formulated to impart an oily feel to leather. Its composition is based on a balanced combination of natural waxes and oils. It is used to provide and keep an oily feel in leathers that are subjected to operations in roller coating machines or spray-gun systems. GEALUX CK 25 also imparts a discreet pull-up effect. For this reason, it is also used on light colours requiring effect. GEALUX CK 25 must be mixed with water or other anionic and cationic products as necessary. Due to the pleasant, moist feel it provides, this product may also be used as a final feel agent on other kinds of finishes.
