

GEORESIN FG 55

Chemical Nature:	acrylic copolymer emulsion
Active Substance:	approx. 16%
pH (10%):	approx. 9,0
Ionic Charge:	anionic
Aspect:	yellowish transparent liquid
Film Hardness:	soft
Film Transparency:	transparent
Utilization:	natural articles

PROPERTIES

GEORESIN FG55 is an acrylic resin with unique characteristics, developed from special monomers. GEORESIN FG55 makes a soft and elastic film with a silky hand feeling. Finishes with GEORESIN FG55 are smooth, transparent and have low surface tack. Due to its small particles, GEORESIN FG55 is indicated for light and natural finishes. GEORESIN FG55 has very good penetration and adhesion properties consequently.
