

## **GEOFAT CK 50**

<b>Chemical Nature:</b>	oil made by the combination of synthetic fatliquors with amidic base, modified by additives
<b>Active Substance:</b>	approx. 50%
<b>pH:</b>	approx. 4,5
<b>Ionic Charge:</b>	cationic
<b>Aspect:</b>	beige liquid
<b>Stability to Electrolytes:</b>	very good
<b>Light Fastness:</b>	excellent
<b>Utilization:</b>	all types of leather, applied at the end of retanning or rechromaing

### **PROPERTIES**

---

GEOFAT CK 50 is a cationic oil with carefully selected components. Indicated for any type of leather, its use is recommended after the ]chrome baths, providing it's more homogeneous diffusion within the dermal fiber. GEOFAT CK 50 also produces good results whenever used at the end of retanning, as it fatliquors the leather grain surface providing greater protection during the drying processes. Besides these physical properties, GEOFAT CK 50 gives dyeing intensity, and a very silky and agreeable surface touch to leathers.
