

GEOFAT FINISH HF

Chemical Nature:	natural modified oil
Active Substance:	approx. 100%
Ionic Charge:	non-ionic
Aspect:	yellow to light brown
Utilization:	pull-up type finishes with waxy touch for water repellent leathers

PROPERTIES

GEATOIL FINISH HF is a finish oil that provides pull-up effect and silky touch. It can be used pure or combined with the wax GEAWAX FINISH PW 200 in water repellent leathers, without harming the final results, in MAESER as well as in BALLY tests. The proportion to be used depends on the desired final effect.

When used pure at minimum amount of 16g / ft², GEOFAT FINISH HF provides great effect in waterproofing leather, even if the leather have not been treated for this purpose in the retanning.
