

## **GEAPUR K 1050**

<b>Chemical Nature:</b>	aqueous dispersion of aliphatic urethane polyester
<b>Active Substance:</b>	approx. 17%
<b>pH:</b>	approx. 4,0
<b>Ionic Charge:</b>	cationic
<b>Film Hardness:</b>	medium
<b>Film Transparency</b>	brilliant transparent
<b>Aspect:</b>	opalescent liquid
<b>Utilization:</b>	pre-bottom and convering

### **PROPERTIES**

---

GEAPUR K 1050 is a polyurethane dispersion with excellent adhesion and abrasion resistance. It is indicated to use GEAPUR K 1050 along with the GETTI cationic range of products to achieve the desired results. GEAPUR K 1050 provides a small particles film with good penetration. Its usage is indicated for pré-bottom layers for polishing, with excellent results for upgrading and absorption between finishing layers.
