

## **GEOFAT 1041**

<b>Chemical Nature:</b>	sulphochlorated hydrocarbons based fatliquor combined with natural oil
<b>Active Substance:</b>	approx. 60%
<b>pH (10%):</b>	approx. 7,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	dark chestnut liquid
<b>Stability to Electrolytes:</b>	very good
<b>Light Fastness:</b>	medium
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOFAT 1041 is a synthetic fatliquor combined with natural raw materials. Due to its composition it is stable in a wide range of pH, and also can be used in floats containing high quantities of mineral salts. GEOFAT 1041 presents excellent penetration throughout the leather fibers improving the physical-mechanical tensile and tear strength, grain rupture and elongation resistance.
