

GEOFAT FINISH 1449A

Chemical Nature:	combination of self-emulsifying oils
Active Substance:	approx. 98%
Ionic Charge:	non-ionic
Aspect:	chestnut liquid
Utilization:	finishes with pull up effect and natural burnish

PROPERTIES

GEOFAT FINISH 1449A is a self-emulsifying oil used in pull up type finishes. Used plain or diluted in water provides pull up effect and increases the leather's reactivity. Whenever used on the flesh side gives softness to leathers, and absorption uniformity of the oils applied on the grain side. In order to increase the darkening effect, it is recommended to combine GEOFAT FINISH 1449A with GEALUX 2000 in the desired proportion. Its application can be in roller coating machines as well as by spray guns. After the application, it is ideal to apply hot smooth plate or felt polishing. For presenting good affinity with water it enables to finish leathers with good finish anchorage.
