

## **GEAPUR EB 20**

<b>Chemical Nature:</b>	combination of polyurethane-based binders
<b>Active Substance:</b>	approx. 18%
<b>pH:</b>	approx. 8,5
<b>Ionic Charge:</b>	anionic
<b>Film Hardness:</b>	medium
<b>Aspect:</b>	clear liquid
<b>Utilization:</b>	polyurethane providing gloss on finish effects

### **PROPERTIES**

---

GEAPUR EB 20 is a polyurethane used in the application of special effects such shading off or staining. It is recommended to apply GEAPUR EB 20 mixed with isopropyl alcohol and aniline in quantities that vary according to the desired effect. GEAPUR EB 20 may be applied in spray-gun or roller coating systems which impart excellent distribution and surface evenness. When used in patent-like articles it is recommended to perform a mild fixation with lacquer or polyurethane prior to applying the finishing varnish. GEAPUR EB 20 provides finishes with medium hardness film with good shine and good natural aspect.
