

GEATOP MN

Chemical Nature:	combination of water-based aliphatic polyurethanes and acrylates
Solids Content:	approx. 10%
pH:	approx. 9,0
Ionic Charge:	anionic
Film Hardness:	medium
Film Transparency:	clear and glossy
Aspect:	white liquid
Utilization:	solution for finish effects

PROPERTIES

GEATOP MN is a solution that has been especially formulated for the application of finish effects that demand excellent physical test results. GEATOP MN forms a good clear, natural-looking, semi gloss film with excellent flexibility. The physical properties of GEATOP MN are optimised when it is cross-linked with auxiliary products such as aziridine 100% (GEAFIX 7). GEATOP MN may be applied in roller coating or spray-gun systems imparting excellent distribution and surface levelling. Due to its particular properties, it is only necessary to add aniline and/or pigment in the quantity desired prior to application.
