

## **GEOFAT PRS**

<b>Chemical Nature:</b>	natural/ animal sulphited oil
<b>Active Substance:</b>	approx. 87%
<b>pH (10%):</b>	approx. 7,0
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	chestnut liquid
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOFAT PRS is a sulphited natural/animal oil developed from selected raw materials. It provides leathers with high grade of softness. GEOFAT PRS can be used in all types of leathers whenever softness is required for the whole leather substance.

Due to its composition, GEOFAT PRS produces very fine emulsions with good penetration and excellent fixation with the leather fibers. GEOFAT PRS provides very clean and light color leathers, without yellowish spots. On chrome tanned leathers it can be used in the fatliquoring of several articles: patent leather, semi-chrome, nubuck, and all types of napa.
