<b>Stability to Electrolytes:</b>	medium
<b>Stability to Acids:</b>	Very good at a pH above 2.0
<b>Light Fastness:</b>	excellent
<b>Utilization:</b>	all kind of articles

### **PROPERTIES**

---

GEOFAT PS is a high quality fatliquor, developed from specially selected raw materials. Refrigerated and filtrated below 0oC, it provides an excellent performance fatliquoring. It produces soft, full and silky hand feeling leathers, however, without compromising the grain tightness.

Due to its excellent light fastness, its usage is highly indicated for athletic white leathers.
