

GEAGROUND K6

Chemical Nature:	combination of waxes and binders
Active Substance:	approx. 11%
pH:	approx. 9,0
Ionic Charge:	anionic
Aspect:	greyish beige liquid
Utilization:	compact for natural finishes

PROPERTIES

GEAGROUND K6 is a compact product formulated for natural finishes that require transparency, natural aspect and gloss. Its balanced composition allows for a wide range of applications on protein finishes. When used as an only product, it is recommended to add water in a 1:1 ratio or according to the desired effect. Metal complex dyes and a small quantity of pigment may be added to this product. Use GEAGROUND K6 in base coats. In top coats, it is recommended to use polyurethanes or combinations with products in the GEABIND and GEAPUR ranges with cross-linking auxiliaries in order to increase the physical resistances of the leather.
