

GEALUX QT

Chemical Nature:	water-based emulsion of natural and synthetic waxes and special agents
Active Substance:	approx. 30%
pH:	approx. 9,0
Ionic Charge:	anionic
Aspect:	yellowish liquido
Utilization:	two-tone effect and surface shine

PROPERTIES

GEALUX QT is a wax that has been especially developed to provide two-tone effect and surface gloss to leathers that are subjected to mechanical strain including in pigmented finishes and as final top coats. Due to its balanced composition, GEALUX QT offers excellent light fastness and may be coloured with metal complex dyes should a colour correction become necessary.

For application with spray-gun, dilute GEALUX QT in water in the ratio of 10 a 20% of product, or apply GEALUX QT directly in the milling operation by spraying it into the drum if the equipment in use allows it.
