

GEOFAT LN

Chemical Nature:	oil made through lanoline sulphitation with animal oil
Active Substance:	approx. 45%
pH:	approx. 8,0
Ionic Charge:	anionic
Aspect:	dark beige liquid
Stability to Electrolytes:	very good
Light Fastness:	excellent
Utilization:	all kind of articles

PROPERTIES

GEOFAT LN is a fatliquor developed from a combination of lanolin oil and animal nature additives. Using GEOFAT LN on the main fatliquoring the leathers will be full, soft and reactive. Due to its composition, GEOFAT LN will improve the traction and tear strength of the leathers, as well as improving the grain rupture due to its superficial action. Its usage is indicated for patent leathers, veg type leathers and napas.
