

GEABIND 1605

Chemical Nature:	polyamide
Active Substance:	approx. 15%
pH:	approx. 9,0
Ionic Charge:	anionic
Aspect:	translucent liquid
Utilization:	all kind of articles

PROPERTIES

GEABIND 1605 is a product of polyamide condensation, soluble in water in any proportion. GEABIND 1605 forms a transparent, brilliant, and flexible film. Due to its physical-chemical characteristics, it has very good resistance to dry and wet friction. GEABIND 1605 can be used for all coats of proteinic finish, resisting as well to polish on stone or felt and glaze. GEABIND 1605 is also indicated for pigmented leathers, with the purpose of obtaining gloss, natural touch and transparency.
