

GEATOR AP 47/2

Chemical Nature:	combination of organic solvents with low molecular weight
Active Substance:	
pH:	approx. 7,0
Ionic Charge:	anionic
Aspect:	orange liquid
Utilization:	penetrator for crust dyeing trough immersion

PROPERTIES

GEATOR AP 47/2 is an auxiliary specially developed for crust dyeing processes. The main purpose to use GEATOR AP 47/2 is to have through dyeing and it can be use on immersion machine as well as roller coater. It can also be used as a conventional penetrator by spray, with excellent leveling and color enhance.
